PROFESSIONAL SUMMARY

Software Development Engineer with 6 years of experience, 3 of them as an SDE II at Amazon building event-driven AWS services for 1.5M employees across 67 countries. First place in an org-wide hackathon for an AI ticket-triage system on Bedrock. Backend and platform work in Kotlin, Java, and Python, plus independently shipped mobile and ML projects.

PROFESSIONAL EXPERIENCE

Amazon | Boston, MA

Software Development Engineer II Dec 2021 - Jan 2025

- Led 3 engineers to architect API Gateway and Lambda middleware (Kotlin, Python) bridging new and legacy onboarding systems, with phased regional rollout and automatic rollback for ~1–2K new candidates ingested weekly out of ~7K monthly corporate hires
- Won first place in an organization-wide hackathon by building an AI-powered ticket triage system that categorized and auto-responded to support requests using AWS Bedrock, Lambda, SNS, SQS, DynamoDB, React, and TypeScript
- Led an 8-person cross-functional team as Scrum Leader to ship a personal information management portal on AtoZ serving 1.5M employees, ensuring compliance with laws and regulations across 67 countries
- Designed a DynamoDB single-table data model with an OpenSearch analytics pipeline for long-term storage, supporting an onboarding system tracking ~15,000 concurrent candidates across 13 contingencies
- Built an automated document verification system processing 2K+ requests in 6 months with 90% accuracy, ensuring compliance with data privacy regulations across 67 countries
- Developed a notification engine using DynamoDB, Lambda, and SNS that calculated and dispatched 80K reminder alerts within 6 months to employees with incomplete life events

The Cape Cod Five Cents Savings Bank | Hyannis, MA

Software Developer I Apr 2019 - Dec 2021

- Led Git/GitLab adoption and engineered a CI/CD pipeline from development to production with GitLab Runner, xUnit, and bUnit, reducing deployment risk
- Saved over \$2,500 annually by building C# automation tools, including real-time ATM status monitoring running at one-minute intervals

SELECTED PROJECT

Mekuru | Mobile Reader App with OCR/ML Backend | [Google Play](#)

- Built and published a Japanese reading app (Flutter, Dart, Riverpod, SQLite) with offline dictionary lookup via MeCab tokenization, vocabulary tracking with Anki export, and localization in 4 languages across 100+ releases
- Developed a companion OCR server (Python, FastAPI) using ML models for manga text detection and recognition, with Docker containerization

TECHNICAL SKILLS

Cloud & Infrastructure: AWS (Bedrock, API Gateway, Lambda, DynamoDB, SNS, SQS, S3, Athena, QuickSight, Glue, OpenSearch), Firebase, Docker, CI/CD Pipelines

Languages: Kotlin, Java, Python, Dart, C#, SQL, TypeScript, JavaScript, HTML, CSS

Frameworks & Tools: AWS CDK/SDK, Flutter, React, FastAPI, Git, GitLab, GitHub Actions

EDUCATION

University of California, Davis

Bachelor of Science in Computer Science March 2019 | GPA: 3.52 | Dean's List: Spring 2016, Fall 2017

Japanese Language School | Tokyo, Japan

Intensive Japanese Language Program Apr 2025 – Present
